CASE STUDY

4 New Square is a leading commercial set of barristers chambers based in London's focal thoroughfare for the legal profession, Chancery Lane.

Location: 4 New Square London office

Installation: Apr 2018

Product: Aircharge wireless surface charger, black nylon with aluminium surround. Aircharge Orb adaptor.

Nº units: 45 installed in desks and meeting tables

WIRELESS CHARGING TECHNOLOGY TO SUPPORT FLEXIBLE WORKSPACES AND A MOBILE WORKFORCE

Recognising its members and employees heavily rely on their phones throughout the day, both when in the office as well as oGsite, 4 New Square approached wireless charging leader Aircharge to provide a safe and convenient solution to allow them to keep their devices powered and connected without having to rely on carrying cables or power banks.

Aircharge develops Qi certified, Apple compatible wireless charging technologies for a seamless surface or subsurface integration into any desk or tabletop, allowing users to charge by simply placing their phone on top of the charger and thus providing more flexibility and choice to employees.

EASY INSTALLATION

With 4 New Square employees switching between collaborative, common and private areas and meeting rooms, Aircharge installed 45 wireless surface chargers across 13 meeting rooms, workstations and individual desks,

allowing them to charge their phone by simply placing on top of a charger, no matter which area in the office they are working from.

Aircharge has been engineered with a quick installation design that fits into 18-50mm thick desktops which allowed the chargers to be retrofitted into standard 80mm grommets drilled in the existing furniture at the 4 New Square office.

Aircharge oGers a range of bespoke textures and materials including veneer, leather and tempered Gorilla glass options. 4 New Square opted for a classic black nylon charger with aluminium surrounding for a premium finish and enhanced experience.

FUTURE PROOF THE OFFICESPACE

Qi wireless charging is the universal standard for wireless charging, utilised in the latest devices from Apple, Samsung, LG, Sony, etc. and available in over 100 models.

Aircharge chargers came complete with the Aircharge 'Orb' adaptor, the world's first and only 'Made For iPhone' certified multi head connector with micro-USB, Lightning and USB Type-C adaptors to charge non-Qi devices and accessories.

THE WIRELESS CHARGING PROVIDER OF CHOICE IN THE WORKPLACE

Aircharge provided 4 New Square with full support throughout the implementation process, including placement recommendation, layout design, and installation services.

Manufactured using state-of-the-art, superior grade components for contract use, Aircharge oGered 4 New Square the connectivity and infrastructure to truly enable flexibility in the workplace and remove the hassle of managing charging cables.

ENHANCE YOUR OFFICE EXPERIENCE WITH AIRCHARGE WIRELESS CHARGING

Pride yourself by oGering advanced and modern wireless charging facilities in your workspace. When you install Aircharge in your meeting rooms, lounge, lobby or work stations, you provide a level of convenience that your employees and visitors will truly appreciate.

'Aircharge is a great addition to our office environment, appreciated by all our staff and clients.'

Ian Wheeler, IT Manager
